Pneumonic Strategies/Memory Strategies
May complete in groups of 1-3

Look over our list of terms from the unit. Select three of the words from that list and create <u>one</u> memory strategy for **each** of the three words.

Do <u>NOT</u> just write a definition. Somehow you need to **link** your definition to the word. It is NOT enough to define the word; instead when you see that definition something in it will tip you off to what word it is capturing.

Example: <u>F</u>oreshadow = predicts the <u>f</u>uture

<u>Clear</u>ance = priced to <u>clear</u> out the store

<u>Meta</u>phor = is like a <u>metamorphous</u> where one thing literally becomes something else.

<u>Pent</u>agon = looks like a penthouse
