**Is your Drinking water safe?**

**Would you like your water tested?**

This is your opportunity to have your drinking water professionally tested for arsenic and 22 other minerals and metals at a substantially reduced price **only until Nov. 15, 2018.**

Arsenic is naturally-occurring in our local drinking water. Our area has some of the highest levels in the state of Wisconsin. Arsenic causes various forms of cancer. Arsenic levels do change over time.

# Is your Drinking Water Safe?

Sample your water at the pressure tank faucet, before your water goes through a water softener. If this is not available, then take the water sample at an outside faucet on your house (as it is often hard water). Let the water run for a few minutes, then fill the sample bottle and cap.

Cost of Testing is only **\$30**.

The normal price for this same package is \$131, at a **savings of \$101!!!** This reduced price is only available until November 15, 2018 and only through Seymour HS.

A 2018 WSST Grant is also partially supplementing your cost to have your water tested. Financial assistance is available for those who qualify through the grant. Please contact Dennis Rohr at 833-2306 or email to [drohr@seymour.k12.wi.us](mailto:drohr@seymour.k12.wi.us)

**Inside your kit: Fill out upper left side of yellow "Chain of Command" sheet.**

Follow directions on back of yellow sheet how to sample water.

#### How you will receive your results:

Once Clean Water Testing receives your sample, you will get your results in 2-3 weeks, and the Seymour HS Groundwater Research Team will also receive the results.

**Make your check payable to:  
"Clean Water Testing"**

**Return your kit with check  
or correct cash payment  
by Thurs. Nov. 15, 2018 to:**

**Seymour HS office  
between 8:30am-3:30pm  
10 Circle Drive  
Seymour, WI 54165  
Phone 920-833-2306**

If you are interested in having other substances tested in your water, please contact Clean Water Testing.
